

EXECUTIVE LOW ALLOY WELDING CONSUMABLES

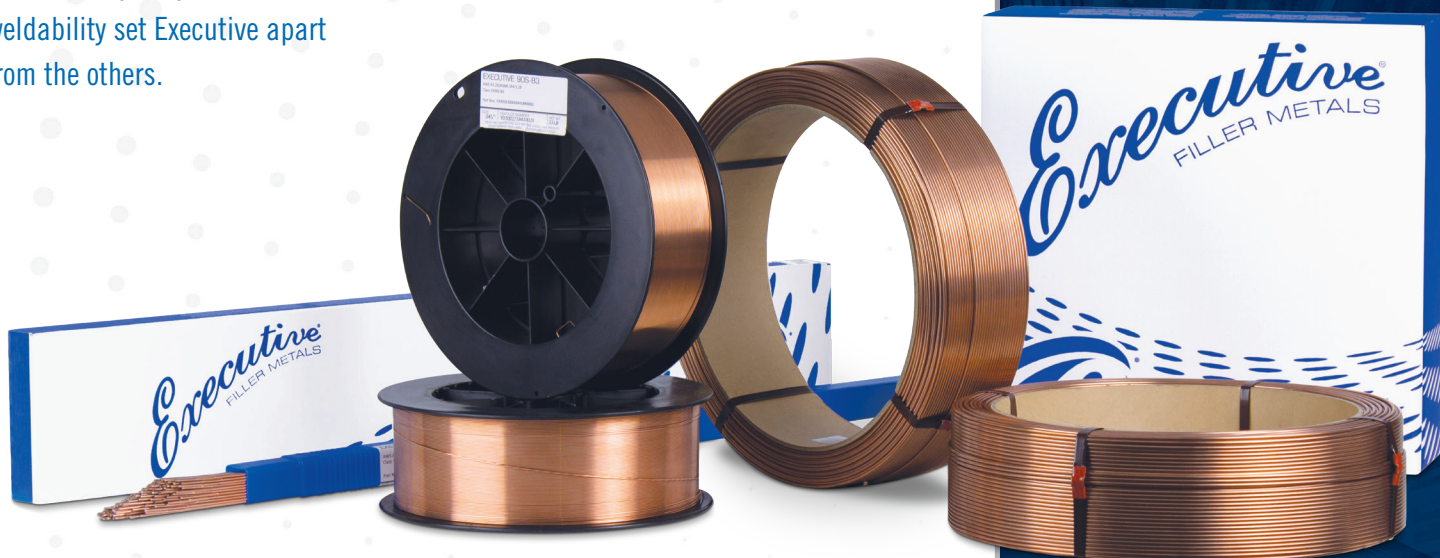

Executive filler metals provide unparalleled quality, consistency and reliability designed to exceed the performance requirements necessary in today's demanding welding industry.

Executive products are manufactured to our stringent specifications, well beyond AWS/SFA standards and are certified to many industry approvals including EN.

Produced with additional alloying elements like nickel, chromium, molybdenum and manganese, Executive Low Alloy products are suited for the toughest environments. Consistent quality and smooth weldability set Executive apart from the others.

Executive Low Alloy products are high quality solid wires with excellent operator appeal. All heats are fully traceable with actual chemistries available on certified material test reports.

Available for most welding processes including GMAW, GTAW & SAW, the Executive Low Alloy filler metal line encompasses a wide range of grades and diameters.
