

EXECUTIVE ALUMINUM WELDING CONSUMABLES

Executive filler metals provide unparalleled quality, consistency and reliability designed to exceed the performance requirements necessary in today's demanding welding industry.

Executive products are manufactured to our stringent specifications, well beyond AWS/SFA standards and are certified to many industry approvals including CWB and EN.

Executive Aluminum products consist of high quality, clean wire produced within a tightly controlled process leading to exceptional feedability and consistent welding.

All heats are fully traceable with actual chemistries available on certified material test reports.

The Executive Aluminum filler metal line encompasses a wide range of grades and diameters available for GMAW & GTAW processes in a variety of packaging options ranging from small spools to drums for robotic welding.

Executive wires are well suited for the most demanding applications in the industry and continue to set the standard in Aluminum welding.
