FILLER METALS

EXECUTIVE NICKEL ALLOY WELDING CONSUMABLES

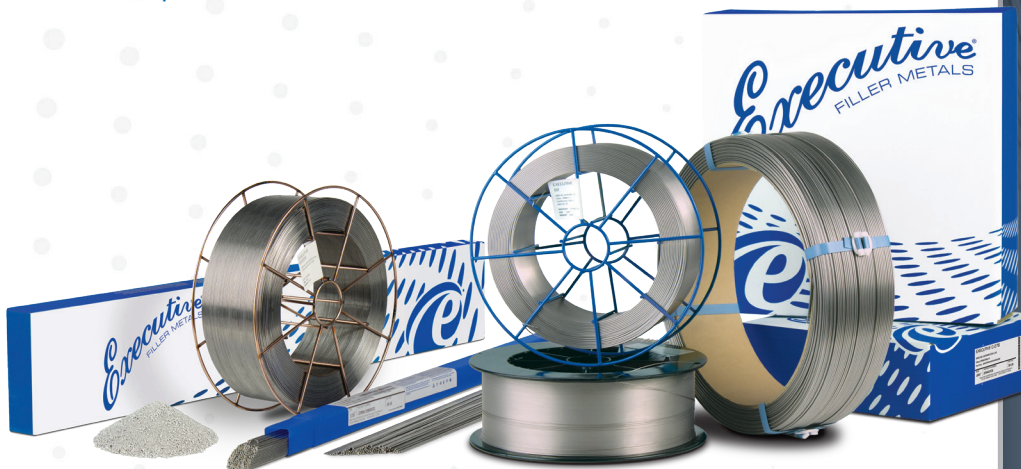

Executive filler metals provide unparalleled quality, consistency and reliability designed to exceed the performance requirements necessary in today's demanding welding industry.

Executive products are manufactured to our stringent specifications, well beyond AWS/SFA standards and are certified to many industry approvals including CWB and EN.

Executive Nickel Alloy products are exceptionally clean solid wires with superior feedability and a flux cored wire that offers great operator appeal. All heats are fully traceable with actual chemistries available on certified material test reports.

Available for most welding processes including GMAW, GTAW, SAW, & FCAW.

The Executive Nickel Alloy filler metal line encompasses a wide range of grades and diameters available in a variety of packaging options from small spools to drums for robotic welding.
