

Executive Stainless FCAW

Executive
FILLER METALS

A premium line of flux cored stainless steel wire.

This new generation of stainless cored wire is designed to provide exceptional welds at a very competitive price.

Available in both flat and all-position in various grades as well as a TG (thin-gauge) option for a wider current range that cannot be achieved with a conventional .045" wire.

Executive Stainless FCAW wires exhibit higher deposition rates of 50-60% over covered electrode and 10-20% over solid wire when compared at the same welding current.

Features include easy to remove slag, smooth weld bead appearance, low spatter levels and very low fume.

Executive Stainless FCAW provides great performance for all types of general stainless fabrication including piping, tanks and pressure vessels.

Executive FCAW Advantages

- High quality features at a competitive price
- Available in both flat and all-position
- Very low fume, spatter, and easy slag removal
- Unique TG option is available for thin gauge welding
