

## Description and Application

This is a rutile flux cored wire which operates with a very stable, spatter free arc producing bright, smooth weld bead surfaces and self releasing slag.

**DW-317L** is designed for welding 18%Cr-12%Ni-2.5%Mo-N (type 316LN) or 19%Cr-12%Ni-3.5%Mo (type 317L) stainless steels. Due to the low carbon contents in the weld metal, it is possible to obtain high resistance to intergranular corrosion.
