

EXECUTIVE STAINLESS STEEL WELDING CONSUMABLES

Executive filler metals provide unparalleled quality, consistency and reliability designed to exceed the performance requirements necessary in today's demanding welding industry.

Executive products are manufactured to our stringent specifications, well beyond AWS/SFA standards and are certified to many industry approvals including CWB and EN.

Executive Stainless Steel products consist of high quality solid wires, flux cored wires and coated electrodes, all with excellent operator appeal. All heats are fully traceable with actual chemistries available on certified material test reports.

Executive Stainless Steel solid wire features smooth feedability, exceptionally clean surface condition, consistent chemistry and controlled ferrite.

Available for most welding processes including GMAW, GTAW, SAW, SMAW & FCAW.

The Executive Stainless Steel filler metal line encompasses one of the widest ranges of grades and diameters available in a variety of packaging options from small spools to drums for robotic welding.
